

Seals Over Wet Stone

Stain Resistant

Superior Protection

New, Breakthrough Water Tolerance Technology

Save Time - Same Money

NS250 represents a new era in sealing technology. No longer is it necessary to wait until the next day for a surface to be completely dry from power washing to be sealed or wait until a surface has completely dried out from a summer storm and has a low moisture content.

Time is money. NS250 advances sealing efficiency by eliminating extra trips, waiting for surfaces to completely dry and being able to get more jobs and work finished each day.

Finally, NS250 is easy to apply, has high coverage and is VOC compliant. (All that is required is a pump up sprayer).

Powerful, High Tech Features

NS250 is a one of a kind professional solution for protecting and extending the life of natural stone.

- Strong stain resistance, including red wines, oils, red clays, and many outdoor tree and vegetation stains
- Protects from salt water and freeze-thaw damage
- Maintains the natural look of most surfaces, little to no color change
- Is both a film forming and penetrating sealer
- Breathable, allows moisture to evaporate
- Naturally self-cleaning; particulate, soil, leaves etc. tend to blow off in rain or wind
- Use on natural stone, ready for foot traffic in 2 hours
