Locks Out Slipperiness

TP300 Professional TRAVERTINE Sealer

Travertine is beautiful, but slippery. TP300 reduces slipperiness plus gives long lasting protection

And, Since Life Can Get Messy,

TP300 gives long lasting protection against slipperiness AND stains

Travertine is slippery and life can be messy. That's how it is. But stains don't have to be inevitable and slipperiness can be reduced. NS300 is a high-performance sealer that reduces slipperiness when the surface is dry and greatly reduces slipperiness when its wet. In addition, TP300 gives strong stain resistance and is designed to help keep stains from setting and makes clean up much easier.

OUTSTANDING PERFORMANCE

Only Serveon Sealants offers a sealer designed specifically to handle the special characteristics of travertine. Other manufacturers can only offer general sealers designed for a broad array of stone types.

ANTI-SLIP FORMULA / BAREFOOT FRIENDLY
