

SERVEON SEALANTS PRODUCTS FOR FLAGSTONE

PRODUCTS THAT PROTECT, PRESERVE AND BEAUTIFY - WE MAKE THINGS LAST!

FLAGSTONE

FLAGSTONE: Flagstone is the general term used to refer to a number of sedimentary and metamorphic rocks. These types of stone are called flagstone because they tend to split easily into flat segments that can be used to pave walkways. When someone refers to a rock as "flagstone," they are not referring to the stone's proper name, only to its suitability for use as a paving stone. Flagstone is generally of medium porosity but varies and comes in a variety of colors. Flagstone will look better and last longer if sealed.

Sealant Considerations: Serveon makes many sealers for protecting flagstone. Some sealers are the water-base versions (for VOC restrictive states) of solvent-based sealers. The right sealer will depend on what is desired to be achieved. Serveon sealants for flagstone will provide protection from water while also providing unique, special protection properties

General Protection: From Weathering/Wear//Flaking/UV Rays/salt-water erosion

RS100-RockSteel; solvent-based, penetrating, repels water, prevents salt-water erosion, strong beading, may slightly darken
[View Product.](#)

NS200-Natural Stone Seal, water-based, penetrating; repels water, prevents efflorescence, strong beading, natural look although may very slightly darken some stone, [View Product.](#)

RS500-Ultra Porous; solvent-based, penetrating, repels water, high performance, strong beading, will slightly darken/enhance, prevents salt-water erosion, dirt/leaf/grass resistance and pickup leaves, [View Product.](#)

NS800-Porous Pro Plus, water-base, penetrating, high performance, strong beading, strengthens substrates, may slightly darken/enhance, prevents salt-water erosion and efflorescence, [View Product.](#)

NS250-StoneSteel Pro, water-based, film forming and penetrating; repels water and most stains, high dirt/leaf/grass resistance and pickup, matte finish, does not affect color, prevents salt-water erosion, [View Product.](#)

Protection from Stains

NS900-Stain Pro, water-based, penetrating; repels water and oil (motor/cooking), nature stains caused by oils, strong beading, slight darkening, [View Product.](#)

RS600-Stain Safe, solvent-based, penetrating, repels water, strong stain resistance including red wine, oils, strong beading, slight darkening, [View Product.](#)

You may also consider,

WL100-Wetlook Gloss, Solvent-based, high performance surface film and penetrating sealer, darkens – enhances, gloss, wet look, repels water, oil, wine, etc., [View Product](#).

WL350-Wetlook Low Sheen, solvent-based, surface film and penetrating sealer; repels water, oils and most stains, enhances/darkens colors giving a wet look, [View Product](#).

Sealants that Enhance and Bring Out Colors

WL350-Wetlook Low Sheen, solvent-based, acrylic, surface film and penetrating sealer; repels water, oils and most stains, enhances/darkens colors giving a wet look, [View Product](#).

WL100-Wetlook Gloss, Solvent-based, acrylic, high performance surface film and penetrating sealer, darkens – enhances, gloss, wet look, repels water, oil, wine, etc., [View Product](#).

RS800-Enhancer, matte finish, water-based, penetrating; repels water, strong beading, , enhances colors, wetlook, slight to moderate darkening, prevents efflorescence, [View Product](#).

Sealants that Prevent Unsightly Mold and Algae's from Forming

CS100-ClearSteel, solvent-based, penetrating; repels water, prevents black algae (the most common), up to seven-year effectiveness, slight darkening [View Product](#).

CS200-Algae Stop, water-based, surface film; repels water, prevents most forms/colors of algae, up to 2–3-year effectiveness, [View Product](#).

Other Protection Considerations

Salt-Water erosion: CN100-Densifier/Consolidator, CN100 is a solvent based, deep penetrating high performance sealer that extends the life of concrete, decaying and deteriorating concrete and cast stone products; greatly reduces cracking, chipping, deterioration, repels water, consolidates and densifies, resists efflorescence, strong beading, slight darkening, [View Product](#).

Anti-Slip Grip, an option for acrylic products, **SG100-Anti Slip Grip**, textured, polypropylene particles added to film forming sealants (WL350 & WL100) that reduce slippage especially when surfaces are wet.
