

## SERVEON SEALANTS PRODUCTS FOR GRANITE

PRODUCTS THAT PROTECT, PRESERVE AND BEAUTIFY - WE MAKE THINGS LAST!

### GRANITE

**Granite**, Granite is a natural stone and the most popular igneous rock. Granite is a light-colored, coarse-grained, igneous rock that consists mainly of quartz and feldspar. It is harder than marble and has visible grains. All types of granite are perfect for everyday use because they are heavy and strong, water resistant, wear and tear resistant, and durable. Countertops, floors, and walls made of different types of granite are also beautiful because this stone gets its full shine when polished. Although very hard and dense, granite is a natural stone and will stain.

---

**Sealant Considerations:** Serveon makes one sealer for protecting Granite. Serveon RS600 sealant will provide protection from water while also providing powerful stain resisting properties.

---

#### Protection from Oils and Most Other Stains

**RS600-Stain Safe**, solvent-based, penetrating, repels water, strong stain resistance including red wine, oils, strong beading, slight darkening, [View Product](#).
