

SERVEON SEALANTS PRODUCTS FOR MOSS ROCK

PRODUCTS THAT PROTECT, PRESERVE AND BEAUTIFY - WE MAKE THINGS LAST!

MOSS ROCK

MOSS ROCK: Moss Rock is a type of sandstone, usually with brown and red undertones, that got its name because it was covered with moss. It is a popular landscape stone and is commonly used within garden pavers, water features and landscape walls. Moss Rock boulders are used for edging garden beds, accents to landscaping and pools, pool waterfalls, and more. Moss Rock is considered porous and should be sealed.

Sealant Considerations: Serveon makes many sealers for protecting Moss Rock. Some sealers are water-base versions for VOC restrictive states. The right sealer will depend on what is desired to be achieved. Serveon sealants for Moss Rock will provide protection from water while also providing unique, special protection properties.

General Protection: From Weathering/Wear/UV Rays/Salt-water erosion

NS200-Natural Stone Seal, water-based, penetrating; repels water, prevents efflorescence, strong beading, leaves natural look although may very slightly darken some stone, [View Product](#).

RS100-RockSteel; solvent-based, penetrating, repels water, prevents salt-water erosion, strong beading, may slightly darken [View Product](#).

NS250-Stone Seal Pro, water-based, film forming and penetrating, repels water, repels stains, prevents efflorescence, high dirt/leaf/grass resistance and pickup, matte finish, does not affect color, [View Product](#).

NS800-Porous Pro Plus, water-base, penetrating, high performance, strong beading, strengthens substrates, may slightly darken/enhance, prevents salt-water erosion and efflorescence, [View Product](#).

WL350-Wetlook Low Sheen, solvent based, acrylic surface film and penetrating sealer; repels water, oils, most stains, enhances, darkens, bring out colors. [View Product](#).

Protection from Stains

NS900-Stain Pro, water-based, penetrating; repels water and oil (motor/cooking), nature stains caused by oils, strong beading, slight darkening, [View Product](#).

RS600-Stain Safe, solvent-based, penetrating, repels water, strong stain resistance including red wine, oils, strong beading, slight darkening, [View Product](#).

Other Protection Considerations

Existing Deterioration/Salt-Water Erosion: CN100-Densifier/Consolidator, CN100 is a solvent based, deep penetrating high performance sealer that extends the life of decaying and deteriorating stone; it greatly reduces cracking, chipping, deterioration, repels water, consolidates, and densifies, resists efflorescence, strong beading, slight darkening, [View Product](#).

Unsightly Algae: CS200-Algae Stop, water-based, surface film; repels water, prevents most forms/colors of algae, up to 2–3-year effectiveness, [View Product](#).
